JEWELLERY BOX HARDWARE

# HAWTHORNE CRAFTS

## New Hardware Website for 2015

We are currently working like busy little elves on our new hardware website aptly named [www.jewelleryboxhardware.com](http://www.jewelleryboxhardware.com) and plan to launch it in early January 2015.

The new site will be accessible directly and also by selecting the hardware section at [www.hawthornecrafts.com](http://www.hawthornecrafts.com) It will use the user friendly Opencart platform to make the whole shopping experience fun – there's even a Wish List (handy).

You will be able view images close-up with ease and the site will automatically calculate postal charges worldwide.

In the meantime please continue to purchase as normal through our main website and we'll notify you once up and ready – We can't wait to find out what you think, so *Merry Christmas and have a Hardware New Year!*

JEWELLERY BOX HARDWARE

## Extending our Hardware Range

The Precision Button Catch is now available in a nickel and *gold plated finish* – with a spring opening for the lid and fitted virtually flush. Costs are £20 (nickel) and £30 (gold-plate) including UK standard delivery. We can post worldwide at either basic/signed-for cost. The standard rear hinge is also now available in a *nickel* and brass finish.

## Large Neat Hinge in Solid Stainless Steel

The large brass neat hinge is proving very popular, with many of you using them for creating large tool boxes and others for treasure boxes.

In fact they are so popular that we now offer them in solid stainless steel for £52 a pair (excludes postage outside UK). They have a mirror-like finish and any accidental scratches can be easily removed. Our range of Neat Hinges and Neat Locks will not flake,

unlike plated hardware. They also operate freely as there are no extra coats of plating to hamper movement. Please send images of your finished boxes with our hardware as we are posting them on our hardware facebook page and plan to run several competitions soon <https://www.facebook.com/jewelleryboxhardware>

*So have a really lovely Christmas everyone and Best Wishes for 2015 - Ian & Kate*
